## aluminum case for glass doors

The New Aluminum case INAL® "*Simply*" series by INTERMETAL SA, for internal glass door and side fixed glass constitutes a minimal solution for easy and fast assembly.

The optimum option for openings in which high level of waterproofness is required. A minimum sized profile with a lower upstand 23mm for Shower, Hammam and Sauna door applications.

Combine the "*Simply*" with INAL® hinges, in the same finishing with the case profiles, that allow door opening up to 147°. Hinges fixing plates are specially designed to support safely the glass. Additional rubber gasket fitted around the case to provide sealing and silent closing. Minimal, aesthetic profile for your interior glass applications.

For a perfect final effect we recommend the following INAL® locks, door handles and latches (pg3).
