handle adjustable alignment

The appearance of a handle in oblique position and the annoying phenomenon of moving handles are characteristics we usually meet in many locks. INAL® VL 155C "Chameleon" provides an Innovative Adjusting mechanism for the handle Alignment and a Restrain mechanism for handle tighten, in order keep the handle always in accurate fixed horizontal position.

Reversible lock body and mechanism for Left or Right door applications.

locking

What we want from a lock is safety, so that on INAL® VL 155C "Chameleon" we used a reliable small sized double lock mechanism (21mm dead bolt) for maximum security.

The lock can be combined with a variety of safety cylinders, cylinders with knob from inside, cylinders with knob for inside and coin slot from outside for WC applications etc.

TYPE 1 - SAFETY KEY CYLINDER

TYPE 2 - SAFETY KEY CYLINDER WITH KNOB

TYPE 3 - CYLINDER WITH KNOB AND COIN SLOT [WC APPLICATION]
